

## **MLConnect Equipment Enclosure For RVs and other mobile home units** (moveable with wheels)

With RV and other moveable structures, equipment is at risk creating a service reliability issue. As such, these locations are required to have an enclosure for MLConnect equipment before the drop and installation can be completed.

For convenience, these can be purchased from MLEC (\$325 plus tax – subject to change), or they can be purchased online directly at:

<https://enclosurehub.com/products/altelix-14x12x8-fiberglass-weatherproof-vented-nema-enclosure-with-120-vac-outlets-power-cord-85-f-turn-on-cooling-fan>

Alternate enclosures can be used; however, they must be pre-approved and meet these required specifications:

- \* Dimensions: 14x12x8.
- \* Be weatherproof.
- \* Include ventilation AND a fan.
- \* Contain at least 2 outlets.
